September 2015: HOW CAN HEALINGS HELP? EVEN MY DOCTORS CAN'T EXPLAIN MY PROBLEM OR HELP ME.

More than a few times, someone has come to me with very intense physical problems. He or she is clearly suffering. But test after test has been run, scans have been taken and there is no sign of anything wrong. From a medical point of view, there is nothing wrong.

I love helping people faced with these mysteries because healing will always help. I don't need a diagnosis to work with the underlying energies, bring things to light and create transformation.

Sometimes just one or two healings will resolve the problem. For instance, a woman called me with severe pelvic pain. She couldn't get out of bed and had been rendered incontinent. I released the emotional pain causing the problem. A week later, she was walking around, the pain gone, and her bladder working once again.

In other cases, the healings will ultimately help the person receive a critical medical diagnosis. For example, Susan was having gastrointestinal issues. Doctors told her repeatedly that there was nothing wrong with her.

But when I ran energy I had a very dark ominous feeling. I was guided to ask Susan if she had life insurance. Susan was mad at me for asking a question like that. However, it galvanized her to go back to her doctors and insist on further testing. They finally discovered that she had Stage 3B cancer of the fallopian tubes. The question I asked probably saved her life. She did healings, chemotherapy, homeopathy and had surgery. She has been cancer free now for close to a decade.

In other cases, there are deep underlying issues. These are the people who are lucky there isn't anything "physically" wrong with them yet that can be detected by modern medical means.

I worked with one woman, Helen, who had severe gastrointestinal pain. She was desperate and wished madly for a diagnosis. But she never got one.

From my perspective, it was an energy imbalance. She was just so tense and such a perfectionist that her system was in a constant state.

As we did healings, she had more and more days where she felt better. But she stopped having healings before her symptoms completely resolved. It was too painful for her to let go of her world vision, of her need to keep the picture perfect, even though it was making her sick.

As you can see there are as many different answers to medical mysteries as there are mysteries. Each case is unique. But healings will always shed light and bring relief.
